Screenshots attached from the Prototype Demo

```
(venv) D:\Cousera_8th_sem\Automated_Branch_Synchronization_and_Compliance_Monitoring_System_T1\automated-branch-sync>python demo_setup.py
Demo repository created at: ./demo_repo
  Branches: master, sprint, dev
  master commits: 5
  sprint commits: 5
  dev    commits: 6

Planted violations:
  - Direct hotfix commit on master (by Dave Senior)
  - Sprint-only feature commit (by Bob Developer)
  - Quick fix directly on sprint (by Alice Developer)
  - Conflicting utils.py changes between sprint and dev
```

==========================================================
  CLEANUP: Automated Branch Sync Prototype
==========================================================

This will remove all generated/temporary files.
Your source code and config will NOT be deleted.

  SKIP:    demo_repo                              (not found)
  DELETED: branch_sync.db                         (SQLite database)
  DELETED: logs                                   (Log files directory)
  DELETED: .pytest_cache                          (Pytest cache)
  SKIP:    __pycache__                            (not found)
  DELETED: src\__pycache__                        (Python cache (src))
  DELETED: tests\__pycache__                      (Python cache (tests))

Done. Cleaned 5 item(s), skipped 2 item(s).

The project is now back to a clean state.
Run 'python3 demo_setup.py' to create a fresh demo repository.
```
